

Flora of Nova Scotia Field Course

BIOL 3293

3 Credit Hours

June 1st – June 19, 2020

Learn about the plant world that surrounds you by identifying species using technical keys, gaining knowledge about our region's most prominent plant families, getting to know our most common species, exploring and reporting on a variety of the region's habitat types, and collecting plant specimens.

Because **plants are almost everywhere you look**, this course should prove useful for students interested in studying or working in the fields of Biology, Ecology, Botany, Environmental Studies and Sciences, Environmental Assessments, Species At Risk, etc.

Includes **lectures and fieldwork**. Prerequisite(s): BIOL 1113/BIOL 1123 with a minimum grade of C-, or permission of the Department.
