

A fundraiser for the Wolfville Refugee Support Network

Have you always wondered why some of the rocks around Minas Basin are black, some white, some red? Why there are fossils in some rocks and not in others? How moving continents, ice ages and tides shaped our landscape over time?

Then this day is for you

Join Dr Elisabeth Kusters for a full day of exploring the geologic wonders along the eastern shore of Minas Basin. We will visit sites at Cheverie and Rainy Cove.

COVID: people may share cars if they feel comfortable. Please bring your own lunch. Wear good hiking boots and proper clothing. No previous knowledge required. Detailed instructions will follow. For questions: e-mail eckusters@gmail.com

Saturday September 25, 9 AM – 4 PM
\$100 per person. All proceeds to Wolfville Refugee Support Group

To book: robertsonfamily@gmail.com
